## PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the Production Center 1P1c.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

## SUMMARY

A POL storage area (Figure 1) is located on the northwest edge of the village of Yaroshenka adjacent to the double-tracked rail line between Vadnyarka, 56 kilometers (km) southeast, and Zhmerinka, 20 km northwest. The yard (Figures 2 and 3) is partially enclosed and compartmentalized by closely planted trees or hedge rows. It covers approximately 345,000 square feet and contains 12 vertical POL tanks and one probable horizontal tank. Four build-

ings in the yard probably house pumping and valving gear. An agricultural railroad station with a possible railroad spur is adjacent to the north side of the yard. The installation is road-served by two-lane crushed rock/gravel roads from the northwest and east.

The installation was covered by [REDACTED]

25X1

[REDACTED] No significant changes were apparent.

## DESCRIPTION OF INSTALLATION

**Railroad Service**

Although the POL yard is adjacent to a double-track rail line, no spurs or POL loading/unloading gear are apparent.

**Road Service**

All roads in the area appear to be seasonal single- or double-lane of crushed rock or gravel. Approaches to the POL yard are from all points; however, direct access is from the east and northwest.

**POL Storage Area**

Area G contains 12 vertical POL storage

tanks with the following diameters: one 50 feet, two 35 feet, [REDACTED] and six 20 feet. A probable 90- by 35-foot horizontal tank is also located in Area G. All tanks except the horizontal tank are light toned.

25X1

**Other Buildings**

An agricultural station is adjacent to the POL yard. It contains 10 miscellaneous buildings, one of which has a square, enclosed tower on the end. A possible rail spur may serve these buildings.
